### **Key Challenges:**

Complexity of aligning the helping hand system with the SFS interior framing , meeting and improving on a challenging programme & deadline.

### **Solutions:**

Regular design coordination meetings, utilizing a tried and tested Helping Hand system, utilising supply chain experts and in house designers who think outside the box when resolving complex situations.

### **Summary:**

The outcome of this amazing looking building was to deliver a stunning School for the Bedfordshire community .With it's amazing "like magic" colour Changing qualities. From being Bright Green to Dark brown depending on which way they are being viewed from, with these colours Contrasting against the pearlescent white panels culminate in delivering a truly stunning looking School..

The secret of this vibrant colour change is a special Crystal effect layer sealed into the outer coating , along with a self-cleaning capacity, will keep these panels looking brand new for years to come ..
